SUBJECT INDEX, VOLUME 10

Acenaphthylene, grafting onto films, 2463
Acetylacetonate–cyclic ether hydroperoxides, metal, catalyst, 1491
Acetylenes, polyphenylenes by cotrimerization, 2033
Acrylamide, copolymerization with *cis*- and *trans*-3-substituted acrylic acids, 187
  polymerization with optically active base catalysts, 1217
  solid-state polymerization, NMR and ESR studies, 1905
3-Acrylamido-3-methylbutanoic acid, polymerization, 3311
Acrylic acid, Diels-Adler adduct with levopimaric acid, 921
  grafting onto polypropylene fiber, 569
  solid-state polymerization, NMR and ESR studies, 1923
  substituted, copolymerizations with acrylamide, 187
Acrylonitrile, alternating copolymers with dienes, 2983
  ceric ion-initiation polymerization, 797
  photopolymerization of, 943, 1543, 2005
Acrylonitrile–butadiene copolymers, dielectric relaxation, 3457
Adsorption of gas on a resin, 1975
Aging, high-temperature, fluoropolymers, 2967
Alkenylcarboranes, 1557
  polymerization of, 937
N,N'-Alkylenebismaleimides, photocyclopolymerization, 1687
Alkyllithium, polar-modified polymerizations and copolymerizations, 1319
π-Allylic nickel complexes, catalysts, 2527
Alternating copolymerization, catalysts for, 2139
Alternating copolymers, 1953
  of complexed monomers, 369
Aluminum alkyls and titanium-*M*-tetrabutoxide, catalyst systems, 309
Amide–imide fibers, 1377
Amination of chloromethylated polystyrene, 3077
Amine–epoxy reaction, aromatic amine, 1861
Amines in ceric ion-initiated polymerizations, 797
  tertiary, polymers of, 625
α-Amino acid *N*-carboxy anhydride, copolymerization, 613
6-Aminocaproic acid, crystallization and polymerization of, as simultaneous processes, 45
12-(β-aminoethyl)-abietan-18-amine, polyamides, 497
Aminolysis, *n*-butyl methacrylate–styrene copolymer, 3017
m-Aminophenol–formaldehyde resin, adsorption of gas and pore structure, 1975
Anethole, cationic copolymerization of, 85
Anilinium hexafluoroantimonate in the polymerization of ethyl vinyl ether, 1165
Anionic copolymerization, vinyl monomers, 1267
  branching of poly(methyl methacrylate), 1391
  1,2-butylene oxide, 1353
  caprolactam, 1411
  diene, 1187
  fluorinated butadiene, 455
  isoprene, 2793
  of isoprenyl monomers, containing aromatic heterocycles, 1149
  lactams, block, 3577
  methyl methacrylate with $Cr(C_5H_7O_2)_3$–$Al(C_2H_5)_3$–$Al(C_2H_5)_2$, 195
  methyl vinyl sulfone, 2189
  propylene oxide, 3089
  of vinyl monomers, 1267
  vinyl monomers with xanthates, 63
Antimony oxide, dehydrochlorination of chlorinated polyethylene, 881
Antimony pentachloride, catalyst, 2237
  copolymerization catalyst, 1895
Antioxidants, sulfur compounds, 1579
Aromatization of polydiethynylbenzene, 975
Ascorbic acid–sodium hydrogen orthophosphate complex, photopolymerization, 1511
Asymmetric interaction, 3569
  effect of pH on, 1701
  optically active polymers with asymmetric small molecules, 1701
Autoxidation, 3555
  metallic salts, 1491
Azidopentaminecobalt(III) chloride, photoinitiated polymerization, 3685
2,2'-Azobis(2,4-dimethylvaleronitrile), initiator in polymerization of styrene, 931
Azobisisobutyronitrile, initiator in photopolymerization of acrylonitrile, 943
α,α-Azobisisobutyronitrile, catalytic decomposition, 2701
1,1'-Azodicyclohexanecarbonitrile, initiator in photopolymerization, 1543
Base cleavage, epichlorohydrin polymers, 2903
Benzaldehyde, cyclocopolymerization with divinyl ether, 1851
Benzene, photoaddition of bismaleimides to, 319
Benzheterocycle–imide fibers, 1377
Benzophenone–triethyl amine, photoinitiated polymerization, 3173

1-Bicyclobutanecarbonitrile, in alternating copolymers, 1953
α,α′-Bis(4-acetoxy-3-methoxybenzylidene)-p-benzenediaceto-nitrile, solid-state photopolymerization, 1311
1,2- Bis(4-aminocyclohexyl)ethane, polyamides from, 2197
1,4- Bisaminomethylcyclohexane, copolyamides, 465
Bis(−)-ephedrin copper(II) chelate, ABIN decomposition, 2701
Bismaleimides, photoaddition to alkylbenzenes, 1093
Bis(oxycarbonylsulfenyl chlorides), polycondensation with diamines, 3165
Bisphenols, in copolyesters, 3217
Bis(triphenylsilyl) chromate catalyst, supported, 2609
Block copolymers, 3503
Block copolymers, polyurethanes containing reactive disulfides, 151
Block copolymerization, 3577
  photo-induced, 2469
Branching, anionic poly(methyl methacrylate), 1391
  vinyl acetate polymerization, 2853
  vinyl trimethylacetate grafted onto poly(vinyl acetate), 2867
Butadiene, alternating copolymer with ethylene, 3027
  alternating copolymer with propylene, 681, 2139
  n-butyllithium–tetramethylethylene–diamine chelate initiated polymerization, 3451
  copolymerization with acrylonitrile, 2983
  mechanism of polymerization, 2527
Butadiene–acrylonitrile copolymers, dielectric relaxation, 3457
Butene-1, copolymerization with sulfur dioxide, 1997
n-Butyl acrylate, γ-radiation-initiated emulsion polymerization of, 581
n-Butyl methacrylate–styrene copolymer, 3017
n-Butylaldehyde, complex with vinyl chloride, 2925
1,2-Butylene oxide, anionic polymerization, 1353
n-Butyllithium, chelated initiator, butadiene polymerization, 3451
  in α-methylstyrene polymerization, 3205
Calcium acetate, catalyst, 3133
d-Camphoric acid anhydride, in asymmetric selective copolymerization, 1207
Caprolactam, anionic polymerization, 1411
β-Carbomethoxypropionaldehyde, polymerization, 3321
Carbon disulfide–alkali metal complex, vinyl polymerization, 2875
Carbon monoxide, copolymer with vinyl chloride, 1709
Carbon-13 NMR, polybutadiene, 1009
Carboranes, icosahedral, 2303
Catalyst system, $AlEt_3$–$VOCl_3$–DMSO, 3113
  $Cr(C_5H_7O_2)_3$–$Al(C_2H_5)_3$, 195
  $TiCl_4$–R_3Al in copolymerization, 3027
  titanium-n-tetrabutoxide and aluminum alkyls, 309
Catalytic action, metallic salts, 1491
Cationic copolymerization, anethole, 85
  THF with propylene oxide, 1895, 2237
  cyclohexene oxide, 3243
  α,β-disubstituted olefins, 673
  α-methylstyrene, 3235, 3243
Cellulose, D-glucopyranosyl units on the surfaces of, 867
  microstructure, 2447
  γ-radiolysis of, ESR study, 2655
  and related compounds, ESR study of γ-irradiated, 1945
Cellulose derivatives, water-soluble, 1669
Cellulosic materials, desorption of ferric ion from, 1001
Ceric ion-initiated polymerization, 797
Chain scission, irradiation of poly(vinyl chloride), 1533
Chain transfer agents, ethylene polymerization, 163
Charge-transfer complex, between polymer and maleic anhydride, 3329
Chelate, initiator, 3451
Chelation, effect on polycondensation, 541
Chloromethylated diphenyl ether, polycondensation reactions, 3103
Chloromethylated polystyrene, kinetics of amination of 3077
Chloroprene, copolymerization with sulfur dioxide, 837
Chlorosilane compounds, in the polymerization of vinyl monomers, 1109
4-Chlorostyrene, telechelic prepolymers, 2025
Chromium catalysts, homogeneous, 3665
Chromium hexacarbonyl, reaction with polystyrene, 379
Chromocene catalysts, ethylene polymerization, 2621
Cinnaniylideneacetic acids, substituted, polyvinylesters of, 3279
Co(II)acetylacetonate, initiator, 1539
Cocatalyst, 1,2,3-propanetriol, 399
Coloration, by organotin compounds, 3109
Column fractionation, molecular weight distribution of polypropylene, 737
Combination reactions, polymer radicals, 3159
Complex, donor–acceptor, polymerization, 2565
Complexes, 287
  NMR, 2925
Conductive organic polymers, 387
Conductivity, effect of high pressure on, 387
Conformation, fluoro-poly(vinyl alcohol), 1617
Conversion, influence on stereoelective polymerization, 2803
Cooligomer, styrene with methyl methacrylate, 3615
Cooligomerization, computer simulation, 3627
  kinetics, 3639
  styrene–methyl methacrylate–CC14 system, 3605

Copolyamides of 1,4-bisaminomethylcyclohexane, 465
Copolyesters of glycols and bisphenols, 3217
Copolymerization, alternating, dienes with acrylonitrile, 2983
α-amino acid *N*-carboxy anhydride, 613
asymmetric selective, 1207
of *cis*- and *trans*-3-substituted acrylic acids with acrylamide, 187
with depropagation, 2349
N-ethylmaleimides with stilbenes, 2223
polar-modified alkyllithium, 1319
of propylene oxide with *d*-camphoric acid anhydride, 1207
styrene and diethyl fumorate, 3253, 3267
styrenetricarbonylchromium, 379
sulfur dioxide and butene-1, 1997
sulfur dioxide and chloroprene, 837
tetrafluoroethylene with vinyl ethers, 2941
THF with propylene oxide, 399
trioxane with dioxolane, 751
vinyl chloride and propylene, 993
vinyl chloride with carbon monoxide, 1709
Copolymers, alternating, butadiene and ethylene, 3027
alternating, butadiene and propylene, 681
alternating, styrene with tricyanoethylene and ethyl 2,3-dicyanoacrylate, 3183
amide–quinoxaline, 1123
1-bicyclobutanecarbonitrile and styrene, 1:1 alternating, 1953
butadiene and propylene, alternating, 2139
4-chlorostyrene and dienes, 2025
composition, 1883
composition of ethylene–vinylacetate, 447
dielectric relaxation of, 3457
gel content of vinyl chloride, 3111
indene with methyl acrylate and methyl methacrylate, 369
intramolecular cyclization of, 2545
kinetics of cyclization, 1271
ordered aromatic polyester, 2713
oxadiazole–imide, ordered, 3373
solution properties of ethylene–vinyl acetate, 419
stereochemistry of alternating, 1297
Copper–amine complex resin and CCl_4, radical initiator, 2601
Cotrimerization of terminal acetylenes, polyphenylenes, 2033
Crosslinking and cleavage of poly(vinyl acetate), 2767
Cupric ion-oligoamide initiated vinyl polymerizations, 1061
Cuprous cyanide, catalyst, 2479
β-cyanopropionaldehyde, polymerization, 2479
Cyclization, of *cis*-1,4-polyisoprene, 1839
intramolecular, styrene-*p*-divinylbenzene copolymer, 2545
vinyl chloride–methyl methacrylate copolymers, 1271
Cyclocopolymerization, divinyl ether and benzaldehyde, 1851
Cyclopolymerization, polyampholytes, 3469
Cyclohexane spiro-5-1,3,2-dioxathiolan-4-one 2-oxide, ring opening polymerization of, 295
Cyclohexene, copolymerization with formic acid, 1763
Cyclohexene oxide, photoinduced polymerization of, 3243
Cycloolefin polymerization, 251
Cyclopolymerization, of divinyl esters of dibasic acids, 139
Cycloolefin, polymerization mechanism, 1601
Decomposition, polyethylene, 2315
Degradation, inhibited, of nylon 66, 1773
poly(vinyl alcohol), 3679
poly(vinyl chloride) with stabilizer, 1051
Dehydrochlorination, of chlorinated polyethylene, 881
photosensitized, of poly(vinyl chloride), 113
Depolymerization, polysulfides, 2573, 2583
Depropagation, 2349
Desorption of ferric ions on cellulosic materials by acids, 1001
Diacid chlorides, with preformed imide groups, 1377
N-(Dialkylaminoalkyl) acrylamides, polymerization of, 595
Diallyl compounds, polymerization, 103
3,3′-Diaminobenzidine, polymerization with pyromellitic dianhydride, 2727, 2751
4,4′-Diaminodiphenylmethane, in melt polycondensations, 1547
α,α′-Dicyano-*p*-benzenediacrylic acid *n*-propylester, 2473
Dielectric constant, effect of high pressure, on, 387
Dielectric relaxation, acrylonitrile–butadiene copolymers, 3457
Diethyl fumarate, copolymerized with styrene, 3253, 3267
Difuroyl peroxide, initiator, 22[illegible]
Di(4-hydroxybutyl)-2,2′-o[illegible]butyrate initiator, 2493
Diimidazolide, polyami[illegible]ides from, 1263
Diisocyanates, polymerization of, 921
1,3-Di(methoxyphosphonic acid) benzene polyelectrolytes, 2497
N,*N*-Dimethyl aniline group, in charge-transfer complex, 3329
7,7-Dimethyl-7H-dibenzo [*c*,*h*]xanthene-5,9-disulfonyl chloride, polysulfonates and polysulfonamides from, 1157
3,3-Dimethyl selenetane, polymerization, 533
1,3-Di-(methoxyphosphonic acid)benzene polyelectrolytes, electrical conductivity, 3447
Dimethylterephthalate, pre-esterification with ethylene glycol, 3133
6,8-Dioxabicyclo-[3.2.1]-octane, polymerization of, 1275

Dioxolane, copolymerization with Trioxane, 751
Diphenylamine, thermally stable polymers from, 553
Dispersions, 1867
Dithionite ions, depolymerization of polysulfides, 2573
Divinyl ether, cyclocopolymerization with benzaldehyde, 1851
p-Divinylbenzene–styrene copolymers, cyclization, 2545
Dye-sensitized photopolymerization, 1511
Electrical conductivity, polyelectrolytes, 3447
Electrical properties, epoxy resin, 1277
Electrocondensation polymers, 2389
Electroinitiation, 3267
  compared with photoinitiation, 3253
Electron microscopy study, polypropylene photo-oxidation, 1077
Electron-donating character, polymeric vs monomeric, 3329
Emulsion polymerization, *n*-butyl acrylate and methyl methacrylate, 581
Emulsions, POO, 1867
Endgroups, 1411
Epichlorohydrin polymers, base cleavage, 2903
Episulfides, ring-opening polymerization, 329
Epoxy–aromatic amine reaction, free-radical initiators, 1861
1,2-epoxy-3-butene, graft copolymerization to polyethylene, 3673
  polymerization, 3673
Epoxy resin, electrical properties, 1277
Epoxides, ring-opening polymerization, 329

Tetrafluoroethylene, copolymer with CF_3NO, 3489
Tetramethyl tetrazene photosensitized polymerizations, 205
N,N,N',N'-Tetramethylethylenediamine, chelate with *n*-butyllithium, 3451
2,2,6,6-Tetramethylpiperadine, 4-methacryloyl derivatives, nitroxyl radicals, 3295
Thermal degradation, polyperfluorobut-2-yne, 2935
a polyphenylimide–quinoxaline, 3651
poly-*p*-oxybenzoate, 1719
polyphenylquinoxaline, 2403
polyurethanes, 1499
poly(vinyl chloride), mechanism of, 1097
Thermally stable polymers, 553
graphite-type structure, 1243
Thermal-oxidative degradation of nylon 6, 605
Thermoxidative degradation, poly(vinyl alcohol), 3679
Thiol–silver complexes, 1963
Titanium polythioethers, 521
Titanium-*n*-tetrabutoxide and aluminum alkyls, catalyst systems, 309
Titanium, $(\pi\text{-}C_5H_5)_2Ti(R)Cl$ with Ziegler catalysts, 1827
Titanocene dichloride, sensitizer in photopolymerization, 2833
Titration curves, polymeric acids, 779
Titration, extent of reaction, 1877
Transesterification, kinetics, 2115
Transition metal–π–allyl complexes, initiator, 251
Transition temperatures, polytetrafluoroethylene, 1745
2,3,4-Tri-O-acetyl-[1→6]-α-D-gluco-, manno-, and galactopyranans, stereoregular, 2045
Tricyanothylene, in alternating copolymers, 3183
Trifluoronitrosomethane, copolymer with tetrafluoroethylene, 3489
Trioxane, copolymerization with dioxolane, 751
Trioxane, radiation-induced post-polymerization, 1883
Triphenylphosphite, photopolymerization of acrylonitrile, 2005
Tryptophan, asymmetric interactions of D- and L-, 1701
Ultraviolet absorption and free radicals, 1679
Urea, interaction with poly(2-hydroxyethyl methacrylate) hydrogels, 2425
Urethane model systems, photodegradation, 503
UV-irradiated poly-3,3-bis-(chloromethyl)oxetane, ESR study of, 123
UV-irradiated polyethylene, ESR study, 3119
Vinyl acetate, brancing in radical polymerization, 2853
kinetics of bulk polymerization, 2245
polymerization in presence of cross-linked poly(vinyl alcohol), 2781
radical polymerization, 1481
suspension polymerization, 2841
Vinyl acetate–ethylene copolymers, composition, 447
solution properties, 419
Vinyl acrylate, polymerization of, 237
Vinyl chloride, complex with THF on *n*-butylaldehyde, 2925
copolymer with carbon monoxide, 1709
copolymerization with propylene, 993
polymers and copolymers, gel content, 3111
suspension polymerization, 2841
Vinyl methacrylate, polymerization of, 237
Vinyl monomers, polymerization with sodium adduct of pyridine *N*-oxide, 2501
Vinyl polymerization, initiated by an oligoamide and cupric ion system, 1061
Vinyl polymers, large π-electron cloud in side chain, 1345
Vinyl trimethylacetate, grafting onto poly(vinyl acetate), 2867
Vinyl stearate multilayers, polymerized by γ-radiation, 2061
Vinyl-substituted pyrylium salts, synthesis, 957
4-Vinylpyridine, polymerization with acylating agents, 2103
N-vinylpyrrolidone, photoinitiated polymerization, 3685
Viscosity, 1411, 3689
Vulcanized rubbers, chemical stress relaxation, 2823
Xanthates, anionic polymerization of vinyl monomers with, 63
Ziegler catalysts, with $(\pi\text{-}C_5H_5)_2Ti(R)Cl$, 1827
$(\pi\text{-}C_5H_5)_2Ti(C_2H_5)Cl$ and higher homologs in, 895
Zinc bromide, 3253, 3267

INTERSCIENCE PUBLISHERS

Copyright © 1972, by John Wiley & Sons, Inc.

Statement of ownership, management, and circulation (Act of August 12, 1970: Section 3685, Title 39 United States Code)

1. Date of filing: October 1, 1972
2. Title of Publication: JOURNAL OF POLYMER SCIENCE
3. Frequency of issue: monthly
4. Location of known office of publication: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
5. Location of headquarters of general business offices of publisher: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
6. The names and addresses of publisher, editor, and managing editor:
   Publisher: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
   Editor: Herman Mark, Polytechnic Institute of Brooklyn, 333 Jay Street, Brooklyn, New York 11201, C. G. Overberger, Dept. of Chemistry, Univ. of Michigan, Ann Arbor, Mich. 48104, and T. G Fox, Carnegie-Mellon Institute, 4400 Fifth Ave., Pittsburgh, Pennsylvania 15213
   Managing Editor: None
7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016

The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc. stock as of September 24, 1972:

Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; John P. Gilbert, exec. of estate of Julia Wiley Gilbert, c/o Wells Fargo Bank Trust Division 37165, P.O. Box 3820, San Francisco, California 94120; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb, Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & William J. Seawright, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Cynthia W. Darby & Julia Gilbert, Trustees, under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Francis Lobdell & William J. Seawright, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Francis Lobdell & William J. Seawright, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Edward P. Hamilton, & Cynthia Wiley Darby, Trustees, under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; Cede & Company, Stock Clearing Corporation, 44 Broad Street, New York, New York; Cudd & Company, 1 Chase Manhattan Plaza, New York, New York; Dif & Company, P.O. Box 1447, 135 Devonshire Street, Boston, Massachusetts; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Palico, c/o Riggs National Trust Department, Washington, D. C.; Salkeld & Company, c/o Bankers Trust, P.O. Box 704, Church Street Station, New York, New York; Sigler & Company, c/o Manufacturers Hanover Trust Company, New York, New York 10015; Trussal & Company, National Bank of Detroit, c/o Trust Department, Detroit, Michigan; Lane & Company, Southern California First National Bank, c/o Trust Department, San Diego, California 92112; Pitt & Company, P.O. Box 2444, Church Street Station, New York, New York

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None
9. For optional completion by publishers mailing at the regular rates (Section 132.121, Postal Service Manual)
   39 U. S. C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in item 1 at the reduced postage rates presently authorized by 39 U. S. C. 3626.
   (Signature and title of editor, publisher, business manager, or owner), Michael Harris, Vice-President

10.	Extent and nature of circulation	Average no. copies each issue during preceding 12 months	Single issue nearest to filing date
A.	Total no. copies printed (*net press run*)	2750	2750
B.	Paid circulation		
	1. Sales through dealers and carriers, street vendors and counter sales	—	—
	2. Mail subscriptions	2295	2295
C.	Total paid circulation	2295	2295
D.	Free distribution by mail, carrier or other means		
	1. Samples, complimentary, and other free copies	122	122
	2. Copies distributed to News Agents, but not sold	—	—
E.	Total distribution (*Sum of C and D*)	2417	2417
F.	Office use, left-over, unaccounted, spoiled after printing	333	333
G.	Total (*Sum of E & F—should equal net press run shown in A*)	2750	2750

(Signature of editor, business manager or owner)

I certify that the statements made by me above are correct and complete. MICHAEL HARRIS
